REASONS FOR AND BENEFITS OF THE CHANGE IN USE OF PROCEEDS

Since the outbreak of the coronavirus disease COVID-19 (the “**COVID-19 Outbreak**”) worldwide, the global economic volatility has increased and respective governments of the world including Singapore, Malaysia and Indonesia, being the predominant markets of the Group have implemented varying degrees of national lock downs, social distancing measures and travel restrictions to prevent the spread of COVID-19.

As a general principle, governments have broadly aimed to minimise the movement and interaction of citizens on both commercial and retail side in order to prevent transmission and reduce the overall impact of the virus on public health. The respective government(s) restrictions resulted in a decrease in retail traffic and hence led to reduction in retail sales in the food and beverage (“F&B”) industry. In addition, it has created unintended challenges such as labour shortages in an already labour intensive F&B industry where remote working is limited, and potential food spoilage(s) due to supply chain disruptions which decreases existing supplies and may increase food ingredients cost.

Having considered the above factors, the Group’s expansion plans have slowed down accordingly, in order to cope with the uncertainties that the COVID-19 Outbreak may bring to the Group’s F&B business in the near future. The Group therefore weighed its costs and benefits and decided to take a prudent approach to reallocate a certain portion of the Net Proceeds, (i) expansion of Non-self-operated Outlets and Restaurants network of S\$990 thousands or approximately HK\$5.7 million, (ii) refurbishment of Self-operated Outlets and Restaurants of S\$590 thousands or approximately HK\$3.4 million, and (iii) marketing and promotion initiatives of S\$360 thousands or approximately HK\$2.1 million to general working capital thereby improving the Group’s liquidity and providing more buffer to cope with the economic uncertainties in the near future.

In view of the above, the Board considers that the above changes in use of proceeds from the Share Offer would allow the Company to deploy its financial resources more efficiently and therefore, are in the best interest of the Company and the Shareholders as a whole and it will not have any material adverse effect on the existing business and operations of the Group.
